Objective

A **Junior Frontend Developer** specializing in **React.js** and **Redux Toolkit**. Passionate about building responsive and user-friendly web applications. Seeking to join a dynamic team where I can contribute my technical skills and grow professionally.

Professional Experience

Instructor March 2025 – present

Arabian Systems Academy — Remote

- Delivered engaging and structured training sessions on **HTML, CSS, JavaScript, React.js** and **Next.js**.
- Designed and developed **customized learning materials** and projects.
- Assisted students through **live coding and interactive sessions**.
- Mentored learners and provided continuous **feedback and support**.
- Worked with the academy to **enhance the curriculum** based on industry needs.

Frontend Developer (Self-Taught) 2023 – Present

Freelance/Personal Projects

- Designed and developed interactive web applications using **React.js** and **Redux Toolkit**.
- Integrated front-end applications with **RESTful APIs** for dynamic content management.
- Built **responsive and cross-browser-compatible** UI components.
- Debugged and optimized applications for better performance.
- Collaborated with designers to enhance **UX/UI**.
